Excellence in Clinical Outcomes

At Acuity Healthcare specialty hospitals we treat some of the most complex medical conditions in healthcare today. Our hospitals are 100% employee owned and set the standard of care in the industry. Clinical outcomes are among the nation's best for ventilator weaning and complex wound healing.

Staffed with highly skilled physicians and clinicians, our hospitals are specifically designed to provide intensive care to ventilator dependent patients and those with extensive non-healing wounds, infections, system failures or complications from surgery.

We believe in a culture of quality and offer a safe environment where all patients, families and visitors are treated with the utmost respect and dignity. We treat your family as our family.
